

## Summer 2022 Elective

The UAA College of Health is excited to offer a new elective course:

### **Interdisciplinary Approaches to Fetal Alcohol Spectrum Disorders (FASD): Best Practices in Alaska**

This interdisciplinary course is designed to educate students on Fetal Alcohol Spectrum Disorders (FASD). Students will be introduced to competences on FASD including: prevention strategies, alcohol use disorders, teratogenic effects of alcohol, risk identification/screening and diagnosis, treatment across the lifespan for individuals with FASD, and ethical, legal, and policy considerations.

This 690 class provides 3 elective credits

**Course Dates:** Summer 2022

**Course Meetings:** Asynchronous learning via the Blackboard course site

**Instructors:** **Jenny Miller**- Population Health Sciences & **Cary Moore**-Occupational Therapy

**Prerequisite:** graduate standing or with instructor approval

Please contact Katie Frost ([krfrost@alaska.edu](mailto:krfrost@alaska.edu)) for registration assistance or Dr. Jenny Miller ([vmiller2@alaska.edu](mailto:vmiller2@alaska.edu)) for information about the course.
